Iranian Monarchist Medical Association

President and Honourable Members,

We would like to express our sincere appreciation and deep gratitude for your decisive and courageous action in placing the Islamic Revolutionary Guard Corps (IRGC) on the list of terrorist organizations and finalizing this designation.

Your decision sends a clear and powerful message in defense of universal values—freedom, human dignity, and the rule of law. The freedom-loving people of Iran will never forget your principled and historic stance. By taking this action, you have shown that you stand on the right side of history and alongside the Iranian people in their just pursuit of liberty, justice, and peace.

Building on this important step, we respectfully urge you to take further action in supporting the democratic alternative sought by the Iranian people. In this context, we believe that Crown Prince Reza Pahlavi represents the sole coherent alternative and the most trusted and unifying figure for a broad spectrum of Iranians, both inside and outside the country, capable of leading a peaceful transition to democracy.

Recognizing his leadership role would send a clear message that the international community stands with a movement grounded in secular democracy, human rights, and the sovereignty of the people.

We sincerely thank you and deeply appreciate your historic responsibility and solidarity with the people of Iran.

Respectfully,

Iranian Monarchist Medical Association
